

Co-located with:

September 10-13, 2017

Mandalay Bay Convention Center | Las Vegas, NV

Energy Storage International, co-located with Solar Power International, paves the way for synergy between energy storage and solar markets. As energy storage increases the power of solar by storing and releasing energy on-demand where it is needed on the grid, both utilities and others can take advantage of increased revenue and customer satisfaction.

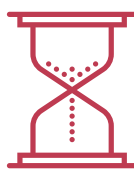

Over **6,500** SPI attendees indicated that they are in or interested in doing business in the **energy storage market**.

The annual **U.S. energy storage market** is projected to reach **1.7 gigawatts** by 2020—with a value of **\$2.5 billion**.

With over **115** exhibiting companies, **ESI is the largest energy storage** exhibition in North America

Featuring over **20 hours** of **energy storage education**

U.S. energy storage market grew **243%** in 2015, **Largest Year on Record.**

Utilities are **the ones investing in energy storage projects**, and because of their size and scale, **it's giving the storage market a big boost.**
